North American Ma

Owned and operated by Vickie Shaffer and her son, Michael Jones; who are heavily involved in the day to day operations from the office to the field. NAMI is the sole manufacturer of **Bottoms Up™** Boat Lift Systems, and **NAMIDocks™**. Each order, whether small or large, is given the same level of personal attention by NAMI's dedicated staff from placing the order to installation; stop by and you will see!

The company was founded in 1995 as White River Barge Co. Ltd. The main thrust of the business was repairing, rebuilding, and demolition of floating structures. In the performance of these tasks, we were afforded first hand experience as to why certain designs fail and how to improve them.

The natural progression was to engage in new construction. Our experience, combined with hundreds of hours consulting with engineers, has resulted in the "Signature Series" dock featuring a box truss design that we offer today. The level of quality and workmanship we provide on private, community, and commercial marinas from expansions, rebuilds and new docks has made us one of the leaders in the industry.

In keeping with the manner in which we have expanded our market, we decided to adopt a name more indicative of our business and growth expectations:

NAMI Offices

Resorts

Repair

Marina builds

arine Industries Inc.

NAMI Yard

North American Marine Industries, Inc., thus the name for the docks emerged, "*NAMIDocks™*".

Another product, which compliments our floating docks and piers, is our boat lift systems. "*Bottoms Up™* Boat Lift Systems", which we design and manufacture, is a level lifting, air actuated boat lift in standard sizes to accommodate boats up to 48 feet in length.

Through the efforts and pride of an extremely dedicated work force, our growth has surpassed our wildest expectations. With a top quality product and offering service second to none, we will continue to expand our satisfied customer base.

We welcome the opportunity to show any prospective customers a tour of our plant and see first hand what sets us apart from the competition. You will be glad you did!

NAMI Docks

Over the years, we have developed one of the strongest, most maintenance free boat docks available on the market. Both as a turn key project, or as a kit dock. All projects are designed and engineered to suit the needs of the marina. Customer service and a quality product are our goals!

Arrowhead Yacht Club, Grand Lake, OK

- A. Options: vinyl edging, bumpers, cleats, electric
- B. Components are hot dipped galvanized
- C. Flotation foam filled roto-molded polyethylene with UV inhibitors, meets U.S. Army Corps of Engineers regulations and Hunt absorption test
- D. Decking choices: concrete, composite and treated lumber

- E. Yoke system to center roofline above head pier
- F. Anchoring shore stand off, winch anchoring or spud poles
- G. Gangways: Signature or Standard
- H. BOX Trussed subframe provides torsional rigidity

Interested in being a NAMI dock Rep? Call us today.

Highlights

- ☞ Dock fingers run through head pier, creating a pre-engineered "H" where members meet.
- ☞ We individually engineer every job.
- ☞ Substructure is 12" in height.

- ☞ All docks are hot dipped galvanized.
- ☞ All connection points have 3" x 3" x 3/16" angle and are made with 1/2" grade 8 bolts.
- ☞ No welding on galvanized parts.

Echo Canyon Marina, Lake Ouichita, AR

Substructure Systems

- 1 1/2" x 1 1/2" x 3/16" Top and Bottom Cords
- 3" x 3/16" Angle at ALL Connection Points
- Options: 2" x 2" x 3/16" and 2" x 2" x 1/4"

- 1 1/2" x 1 1/2" x 3/16" Truss in Side Web and Boxes
- All welding done BEFORE galvanizing
- Platforms for buildings

ROOFING SYSTEMS

Our roofing systems are designed and engineered to fit the individual requirements of the marina owner! Gable and hip roofs, yoke systems for centering ridge over head pier are available.

Concrete

Decking

Composite

ACQ Treated

Flotation

Open Bead Styrofoam

- We use high density 1.50 # styrofoam

Encapsulated Styrofoam

- Roto-molded polyethylene shell
- Virgin grade with UV inhibitors
- 10 year manufacturers warranty

- Meets Corps of Engineers # 36CFR part 27
- Molded mounting slots

Step 1: Float

Step 2: Deck

Step 3: Anchor

Step 4: Roof

Kit docks are great for the "do it yourself" marina or individual dock owner that would like to use their own labor force to hold down costs!

All components, flotation, substructure, decking, columns, purlins, R-Panels, and hardware will be delivered to job site with a detailed set of plans.

We can tailor projects to fit the marina/individual owner's level of expertise. For example, we can provide a technician to assist in roofing or anchoring, leaving the marina/individual owner to attach flotation, bolt substructure together and deck the substructure.

Call for details. Whatever your needs, we have a plan for you!

Options

Our *Signature Series* gangway features superior strength and durability for commercial applications. Constructed of heavy duty tubing vs. the standard angle seen on most ramp systems.

Our *Standard Series* gangway features 2"x3" angle vs. 1 1/2" typically seen in the market.

5th Wheel & Treadplate on the gangway features 2"x3" angle vs. 1 1/2" typically seen in the market.
